Appendix table 7-42. **Leading source of information about current news events: 2001**(Percentages)

Characteristic N				Books/ other print	TV	Radio	Family	Friend/ colleague	Other	Don't know	Sample size (number)
	Newspaper	Magazine	Internet								
All adults	29	3	7	*	53	5	*	1	1	*	1,574
Male	. 29	4	10	*	48	7	*	1	1	*	751
Female		3	5	1	57	4	*	1	1	*	823
Formal education											
Less than high school	22	2	3	0	69	1	0	4	0	1	116
High school graduate	29	3	7	*	54	6	*	1	1	*	834
Baccalaureate degree	30	7	12	1	42	8	0	1	*	*	393
Graduate/professional degree	43	6	10	1	30	9	*	1	1	*	221
Science/mathematics education ^a											
Low	25	2	3	*	62	4	*	2	*	*	674
Middle	33	4	9	*	46	5	*	1	1	1	469
High		6	16	*	35	9	*	1	1	*	431
Attentiveness to science and technol	ogy ^b										
Attentive public	37	7	8	*	44	3	0	*	1	*	195
Interested public	. 27	4	9	1	53	6	*	1	1	*	755
Residual public	29	2	6	*	55	6	0	2	1	*	624

^{* = &}lt;.5

^bTo be classified as attentive to a given policy area, an individual must indicate that he or she is "very interested" in that issue, is "very well informed" about it, and a regular reader of a daily newspaper or relevant national magazine. Individuals who report that they are "very interested" in an issue area but do not think that they are "very well informed" about it are classified as the "interested public." All other individuals are classified as members of the "residual public" for that issue. The attentive public for science and technology combines the attentive public for new scientific discoveries and the attentive public for new inventions and technologies. Any individual who is not attentive to either of those issues but who is a member of the interested public for at least one of those issues is classified as a member of the interested public for science and technology. All other individuals are classified as members of the residual public for science and technology.

NOTE: Percentages may not add to 100 because of rounding. A few respondents did not provide information about their highest level of education. Responses are to the following question: We are interested in how people get information about events in the news. Thinking about the kind of issues we have been talking about, where do you get most of your information about current news events?

SOURCES: National Science Foundation, Division of Science Resources Statistics (NSF/SRS), NSF Survey of Public Attitudes Toward and Understanding of Science and Technology, 2001.

See figure 7-19 in Volume 1. Science & Engineering Indicators – 2002

^aRespondents were classified as having a "high" level of science/mathematics education if they took nine or more high school and college science/math courses. They were classified as "middle" if they took six to eight such courses and "low" if they took five or fewer.
